P.O. Box 249  
Oakley, Idaho 83446

Dear Mr. Mullard:

This letter is a follow up to the meeting you had on May 24, 2005, with Mike Nelson and Larry Garahana of my staff and Lynn Kunzler of the Utah Division of Oil, Gas, and Mining (UDOGM) at the Limelight Green Quarry in Box Elder County, Utah. The purpose of the meeting was to discuss the renewal of your authorization for the quarry on Bureau of Land Management (BLM) surface estate.

At the meeting we GPS'd the quarry perimeter and found that the size was 7.9 acres, not including the access road. We also discussed BLM's and UDOGM's need for you to prepare a mine plan for this quarry. A mine plan would allow both agencies to review your present and future use of the quarry, expansion plans, and future reclamation in accordance with current law and determine the appropriate bond amount. As was explained, the mine plan would need to be in the same or similar format as the one you are currently in the final stages of preparing for your Turquoise Quarry. We would anticipate the mine plan for the Limelight Green Quarry to be a simpler and less complex document, but it should cover the same pertinent items of information.

As a result of the discussion, you agreed that a mine plan as discussed would be prepared for the Limelight Green Quarry for both agencies to review.

It is important that the mine plan be provided to our office before the end of June 2005, in order for us to have time to provide the necessary review and environmental documentation for the renewal of this quarry before the current authorization expires on August 29, 2005. All other information provided with the SF-299 you submitted on April 19, 2005, appears to be satisfactory and no additional information outside of the mine plan is needed at this time.

If you have any questions, please contact Mike Nelson or Larry Garahana of my staff at (801) 977-4300.

Sincerely,

*Marked Slusher*

Acting David H. Murphy  
Assistant Field Manager  
Non-Renewable Resources

Cc: Mr. Lynn Kunzler
